
Filled circles: scored in both networks. Open △ = mouse rank only; open ◇ = human rank only (not assessable in the other network; plotted in grey strips).

Receptors with no NicheNet rank in either species are excluded (CellChat/Geneformer-only candidates: Acvrl1, Axl, Cd74, Cldn3, Fzd1, Fzd2, Igf1r, Met, Notch1,

Color: orange = agonist; blue = block TGFβ; grey = uncertain direction; red ★ = positive control (FGFR2b).

Itgb1: uncertain direction (both ANGPTL4 agonist-plausible and TGFB1 pro-fibrotic ligands). Sdc1/Sdc4 overlap at identical coordinates (both: mouse rank 8, huma
